# SAFETY on a new level

## New innovative LAF Safety Cabinet that enhances safety and comfort

### 2 Available in 4 sizes

- Width: 600 mm
- Width: 1200 mm
- Width: 1500 mm
- Width: 1800 mm

### 3 Easy and intuitive control panel

With touchscreen.  
Can be operated while wearing rubber gloves.  
The control system is developed in accordance with EN 12469.

### 4 Height-adjustable table frame

Can be operated via the control panel.

### 5 EC fans

Low-noise operation and low energy consumption

### 6 LED light

Night light (optional)

### 7 Side frames with glass

Ensure a bright and open working environment inside the LAF Safety Cabinet

### 8 Power outlets

2 x 230V sockets as standard

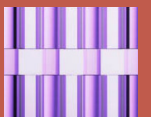

### 9 Easy access for filter replacement

Exhaust filters can be replaced without dismantling the supply filters, reducing both time consumption and the risk of damaging the supply filters.

### NEW UV TECHNOLOGY

Efficient and safe disinfection for daily use (optional)

10

### UVC222 Human-Safe FAR UVC Light

- UVC is both germicidal and safe for human use.
- Sustainable and environmentally friendly – contains no mercury.
- Reduces the use of chemicals.
- Built into the back wall with tilt function, ensuring easy cleaning and no disturbance of the airflow.

Manufactured in Denmark

Produced in accordance with  
DS/EN 12469 and NSF/ANSI 49
